

TRANI

SKU: N/A

TRANI marble comes from a town in Puglia region, which name derives from this type of marble. Quarries are near Trani town and in the neighbourings. It is mostly used to build up staircases, floorings and general claddings

TRANI is a chalky marble compound by a high percentage of Calcium Carbonate

TRANI marble could be manufactured in different and various ways so it is suitable both in indoor and in outdoor uses.
