PRODUCT DESCRIPTION

GRABOC

For their sober, soft and elegant style, the GRABOC terrazzo represent the most refined tiles you can ask for as an outdoor flooring. The upper surface is made of precious granite microchips and it gets the bush-hammered effect thanks to a particular procedure that avoids the splitting of the chips and shows full color and brilliance.

GRABOC cement terrazzo tiles are produced in various standard colours, also upon request they can also be made in other colors.

It is recommended to install it "with joint" of about 15 mm and to plaster a little 'low (avoid smearing with mortar or otherwise wash before it hardens).

Although GRABOC terrazzo tiles terrazzo tile was created as floor tile, it has also proved to be ideal for claddings.
