PRODUCT DESCRIPTION

THE PARKING DETERRENT

The parking deterrent is the element usually used to mark or block areas to prevent the passage or the parking of vehicles.

The standard model is provided with a hook on the upper end to allow the movement , it is also used to fix chains or steel cables to obtain a fence.

In addition to the standard model ("panettone" type) , on demand it is also possible to contemplate the manufacturing of a custom-made sizes, finishing and materials (including also natural stones).
